DETAILED ACTION

1. The amendment filed 1/30/2007 has been entered. Claims 1-20 are pending in this Office action.

Response to Arguments

2. Applicant's arguments filed 1/30/2007 have been fully considered but they are not persuasive.

The rejection of the newly added claims 13-17, and 20 is addressed in below paragraphs 4, and 6.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 13, 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Schilling (U.S. Pat. 5,274,665).

Regarding claims 13, 20, Schilling discloses a method of sending ultrawide bandwidth signals from first and second wireless networks across an available wireless bandwidth, comprising: dividing the available into a high band and a low band (col. 6, lines 48-68); transmitting a first signal in a first wireless bandwidth across a high band; and transmitting a second signal in a second wireless network across the low band (col. 6, line 48 to col. 7, line 14).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schilling.

Regarding claim 14-16, Schilling fails to explicitly disclose the interference band being located between 5.15 GHz to 5.825 GHz; and a low band has a center frequency between 3.6 GHz and 4.6 GHz, or a center frequency of about 4.104 GHz; and the high band has a center frequency between 7.7 GHz and 8.7 GHz. However, Schilling discloses an operating method of wireless networks utilizing offset frequency to separate the networks to prevent interference. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to design the system to operate on any frequency range in order to receive a desired signal.

Regarding claim 17, a use of an ultrawide bandwidth networks are well known in the transmission system. It would have been obvious to one having ordinary skill in the art at the time the invention was made utilize the ultrawide bandwidth in the networks of transmission system in order to receive an advantage of reducing a size of the circuit for a wideband service.

Allowable Subject Matter

7. Claims 1-12 are allowed.
8. Claims 18-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
